

Prescription and Diet Recommendation for AI-Based Skin Disease Detection

Patient Name: giyan

Age: 18

Gender: Male

WhatsApp: +919366185273

Disease: Basal Cell Carcinoma (BCC)

Description:

- A slow-growing type of skin cancer appearing as pearly or waxy bumps.
- Usually caused by long-term UV exposure.

Medication:

- Surgical excision, topical treatments, or Mohs surgery. Regular dermatologist checkups are advised.

Diet Plan:

- Include vitamin E, green tea, and antioxidant-rich fruits.
